🐙 github 📁 portfolio

SUMMARY

Full Stack Developer with hands-on experience building and deploying production-grade web applications using React.js, Flask, and PostgreSQL. Proven ability to independently own end-to-end development — from REST API design and WebSocket integration to responsive UI and cloud deployment. Experienced in AI/LLM integration, JWT authentication, load testing, and CI/CD workflows. Published researcher and AWS-certified professional.

SKILLS

- **Languages:** Python, JavaScript (ES6+)
- **Frontend:** React.js, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, Flask, REST API Development, WebSockets
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase Firestore
- **AI & LLM Integration:** OpenRouter, Cerebras, LLaMA, Ollama, AI API Integration, Prompt Engineering
- **Auth & Security:** JWT, OAuth, Access/ Refresh Token Rotation, Axios Interceptors
- **Testing:** Pytest, Locust
- **Tools:** Git, GitHub, Postman, Docker, GitHub Copilot
- **Deployment:** Vercel, Render
- **Concepts:** Responsive Design, Unit Testing, Decoupled Architecture

PROFESSIONAL EXPERIENCE

Android App Development Intern

02/2026 – 05/2026

MindMatrix EdTech

- Built **Rakta-Vahini**, a real-time blood donor Android app (Kotlin + Firebase) — filters donors by blood group, eligibility, and availability instantly.
- Engineered a 90-day donation eligibility engine applied consistently across all screens from a single Kotlin data class.
- Implemented live Firestore snapshot listeners — donor availability updates in real time, zero manual refresh.
- Resolved 7 production bugs independently — Gradle/AGP conflicts, OTP failures, Firestore mapping errors.
- Used GitHub Copilot and Gemini within Git-based team workflows.

PROJECTS

CampusLoop - Full Stack Real-time Web Platform

Tech Stack: React.js, Flask, PostgreSQL, WebSockets, JWT

Role: Full Stack Developer

GitHub: https://github.com/mashood17/campus_loop 📄 | **Live Demo:** <https://campus-loop-pi.vercel.app> 📄

- Replaced fragmented WhatsApp-based communication with a structured real-time platform - built and deployed full-stack using React, Flask, and PostgreSQL.
- Implemented WebSocket-based notifications via Flask-SocketIO with branch-specific rooms - instant live alerts, zero page refresh.
- Secured 20+ REST API endpoints using JWT access/ refresh token rotation with silent Axios interceptor refresh- zero user disruption on expiry.
- Load tested at 50 concurrent users - 72ms avg response, 23+ RPS, 0% failure rate; 21 pytest tests, 100% pass rate.

GitInsight – GitHub Developer Analytics Platform

Tech Stack: Python, Flask, JavaScript, Chart.js, GitHub REST API

Role: Full Stack Developer

GitHub: <https://github.com/mashood17/gitinsight> 📄 | **Live Demo:** <https://gitinsight-lake.vercel.app> 📄

- Built and deployed a full-stack GitHub analytics platform - decoupled frontend (Vercel) and backend (Render).
- Designed a custom developer scoring algorithm - weighted repos, stars, and followers to classify developers as Beginner, Intermediate, or Advanced; validated by benchmarking against known developer profiles.
- Engineered an automated profile summary engine converting raw GitHub data into human-readable insights integrated with Chart.js visualizations and responsive design.

Student AI Hub – AI Productivity Platform

Tech Stack: React.js, Node.js, Express.js, PostgreSQL

AI Models: Cerebras, OpenRouter, LLaMA, Ollama

Role: Frontend Developer & API Integration

GitHub: <https://github.com/mashood17/student-ai-hub> 📄 | **Live Demo:** <https://frontend-k5qm.onrender.com> 📄

- Sole frontend developer on a team project - independently designed and built 7+ UI modules in React: AI code generator, debugger, chatbot, document summarizer, resume analyzer, roadmap generator, and task manager.
- Built a reusable React component library across all 7+ modules - established a consistent design system and reduced redundant code.
- Integrated dynamic AI model switching across 4 LLM providers (Cerebras, OpenRouter, LLaMA, Ollama) enabling seamless user-controlled selection via REST API integration.

PUBLICATIONS

Job Portal Website 07/2025

Journal of Emerging Technologies and Innovative Research (JETIR)

ISSN: 2349-5162 | Impact Factor: 7.95

- Researched and published full system architecture of a web-based job portal — covering user management, job workflows, and responsive design.

EDUCATION

B.E. Computer Science 2022 – 2026

Srinivas Institute of Technology

Mangaluru

CGPA: 7.82/10

CERTIFICATIONS

AWS Academy Graduate - Cloud Foundations (Amazon Web Services)

DevOps (IBM)

Python Essentials (Cisco Networking Academy)

Python Full Stack Developer Virtual Internship (EduSkills Academy)
